

## **Gregory M. Duncan**

Greg has joined Huron as a managing Director providing consulting to the financial, energy, and telecommunications industries in economics, statistics, simulation methods, marketing research, and intellectual property. He has provided testimony on a variety of telecommunications, labor, and transportation issues before numerous state public utility commissions and legislatures, the Interstate Commerce Commission, and the Federal Communications Commission. Greg has also provided testimony on antitrust and labor cases in state and federal courts.

He investigated and testified to the use of cost models, cost allocations, and price cap estimation and construction in both the energy and the telecommunications industries. He has advised clients on auction mechanisms, firm valuation and bankruptcy, antitrust and damages issues, international trade, and market effects of mergers.

Greg is a member of the American Bar Association, American Economic Association, American Mathematical Society, American Statistical Association, and California Public Utility Counsel. He has spoken at a number of industry events spanning a variety of topics. He also regularly teaches a variety of economics courses at the University of California, Berkeley.
